

SPERRY[®] INSTRUMENTS

Clamp Meter Product Guide

Sperry Instruments clamp meters offer versatility and durability within the Digisnap™ product family. From standard Snap-Arounds to True RMS models, these units combine the safety of non-contact current measurement with multimeter functionality. As with all of the Sperry Instruments products, these units have been designed and tested by those professionals that demand to have the best test instruments on their job site.

DSA600TRMSR

The Sperry Instruments DSA600TRMSR 600A True RMS Clamp Meter has more features and functions without the extra cost! This clamp meter offers a large range of superior functions including inrush current, a built-in work light, frequency and advanced temperature measurement. This unit features data hold, peak hold, and relative functions to maintain the reading on the 5999 count backlit screen and auto power-off functionality to extend battery life. Ships with carry case, heavy duty leads and three AAA batteries included in the package.

DSA1020TRMS

Engineered to exceed the expectations of the professional electrician the DSA1020TRMS is a 10 Function/ 27 range Digital Snap-Around Clamp Meter with precise True RMS circuitry and a 1000 Amp non-contact current reading. Designed with integrated non-contact voltage detection and a Min/Max data hold capable function which allows you to hold either minimum reading or maximum reading on the display. Able to test continuity, resistance, True RMS, frequency, and temperature (probe type) this unit features a backlit LCD display ideal for low light applications and an auto power of functionality to save battery life.

DSA2009TRMS

The DSA2009TRMS features True RMS circuitry and measurement of up to 2000A AC/DC. Features low pass filtering, InRush current, oscilloscope output, and a backlit display with bar graph to meet the toughest jobs head on. CAT IV 600V rated with a lifetime warranty to ensure safety and reliability in the field. Ships with wrist strap, heavy duty leads and 9V battery included in the package.

TRUE RMS CLAMP METERS

DSA200AOC

The DSA200OC is a 27 range, 9 function open jaw clamp meter has a 3999 count backlit screen and 13MM open jaw design for ease of measurement. CAT III 600V and cETLus listed with a lifetime warranty to give our users the peace of mind they deserve. Ships with carrying case, heavy duty leads and two AA batteries included in the package.

DSA500AR

The DSA500AR Sperry Instruments Snap-Around Clamp Meter is a 5 function, 9 range auto-ranging unit engineered to measure AC Current (40-400A), AC/DC Voltage (400/600V), Resistance (400/4000 Ω), and Continuity. This unit features a data-hold switch to maintain the reading on the liquid crystal display (maximum count: 3999) and auto power-off functionality to extend battery life with a low batter indicator to ensure you won't get incorrect readings due to low batteries.

DSA540A

The DSA540A Sperry Instruments Snap-Around clamp meter is a 10 function, 26 range auto-ranging unit engineered to measure up to 400A AC/DC current, 600V AC/DC voltage, 40 Mohm resistance, frequency, capacitance, diode test and continuity. This unit features a data hold and relative measurement to maintain the reading on the liquid crystal display and auto power-off functionality to extend battery life with a low batter indicator to ensure you won't get incorrect readings due to low batteries.

DSA660

The Sperry Instruments DSA660 measures current up to 600A AC and features non-contact voltage detection. Accurately measures voltage, resistance and frequency. This unit features data hold, peak hold, and relative functions to maintain the reading on it's backlit display. Ships with carry case, heavy duty leads and three AAA batteries included in the package.
